Can you point out the inappropriate use of in-text citations and referencing in APA format in the following paragraph?

Chinese parents have generally been characterized as controlling and restrictive without autonomy granting (Chiu, 1987, cited in Chao & Tseng, 2002), yet Chinese children outperform their Western counterparts in a number of academic subjects in international comparisons such as the Programme for International Student Assessment. (PISA, 2009) This puzzle is coined as the "Chinese Parenting Paradox" (Chao, R. K., 1994). The paradox of Chinese parenting was first derived from an early large-scale survey of high school students in the United States (Dombusch, Ritter, Leiderman, Roberts, & Fraleigh, 1987). Results of this survey corroborated with Baumrind's (1991) conjecture, showing that authoritarian parenting style with high demandingness but low autonomy and warmth predicted poor motivation and academic outcomes consistently across gender, age, parental education, ethnic, and family structures. However, this prediction had one exception. It did not work for Asian American groups. Asian American parents were perceived as more controlling than their European counterparts but their children still achieved high grades in school (Dombusch, Ritter, Leiderman, Roberts, & Fraleigh, 1987).
